

Sub 1

What is claimed is:

1. A method for processing a supplementary product sale at a point-of-sale terminal, comprising:  
 receiving a rounding code; and  
 rounding a purchase price based on the rounding code.

2. An apparatus for processing a supplementary product sale at a point-of-sale terminal, comprising:  
 a storage device; and  
 a processor connected to the storage device, the storage device storing  
 a program for controlling the processor; and  
 the processor operative with the program to:  
 receive a rounding code; and  
 round a purchase price based on the rounding code.

3. A method for processing a supplementary product sale at a point-of-sale terminal, comprising:  
 receiving a rounding code, the rounding code having a corresponding rounding multiple; and  
 rounding a purchase price based on the rounding multiple.

1 4. An apparatus for processing a supplementary product sale at a point-of-sale  
 2 terminal, comprising:  
 3 a storage device; and  
 4 a processor connected to the storage device,  
 5 the storage device storing  
 6 a program for controlling the processor; and  
 7 the processor operative with the program to:  
 8 receive a rounding code, the rounding code having a corresponding  
 9 rounding multiple; and  
 10 round a purchase price based on the rounding multiple.

1 5. A method for processing a supplementary product sale at a point-of-sale terminal,  
 2 comprising:  
 3 receiving a rounding code;  
 4 determining a rounding multiple corresponding to the rounding code; and  
 5 rounding a purchase price based on the rounding multiple.

1 6. An apparatus for processing a supplementary product sale at a point-of-sale  
 2 terminal, comprising:  
 3 a storage device; and  
 4 a processor connected to the storage device,  
 5 the storage device storing  
 6 a program for controlling the processor; and

7 the processor operative with the program to:  
 8 receive a rounding code;  
 9 determine a rounding multiple corresponding to the rounding code; and  
 10 round a purchase price based on the rounding multiple.

1 7. A method for processing a supplementary product sale at a point-of-sale terminal,  
 2 comprising:  
 3 receiving a plurality of rounding codes, each rounding code having a  
 4 corresponding rounding multiple and fixed price;  
 5 determining a purchase price; and  
 6 rounding the purchase price based on the rounding codes.

1 8. The method of claim 7, in which the step of rounding comprises:  
 2 adding at least one of the fixed prices to the purchase price, thereby generating an  
 3 augmented purchase price; and  
 4 rounding the augmented purchase price based on a rounding multiple.

1 9. The method of claim 7, in which the step of rounding comprises:  
 2 rounding the purchase price based on a rounding multiple, thereby generating an  
 3 augmented purchase price; and  
 4 adding at least one of the fixed prices to the augmented purchase price.

1 10. The method of claim 7, in which the step of rounding comprises:

2 selecting a rounding code, thereby defining a selected rounding code and a set of  
3 unselected rounding codes.

1 11. The method of claim 10, in which the step of rounding further comprises:  
2 adding the fixed price of each unselected rounding code to the purchase price,  
3 thereby generating an augmented purchase price; and  
4 rounding the augmented purchase price based on the rounding multiple of the  
5 selected rounding code.

1 12. The method of claim 10, in which the step of rounding further comprises:  
2 rounding the purchase price based on the rounding multiple of the selected  
3 rounding code, thereby generating an augmented price; and  
4 adding the fixed price of each unselected rounding code to the augmented price.

1 13. The method of claim 10, in which the step of selecting a rounding code  
2 comprises:  
3 selecting a rounding code having a rounding multiple that is not greater than the  
4 rounding multiple of each unselected rounding code.

1 14. The method of claim 10, in which the step of selecting a rounding code  
2 comprises:  
3 selecting a rounding code having a minimal rounding multiple.

1 15. The method of claim 7, in which the fixed price and the rounding multiple of each  
2 rounding code are equal.

549 62 }  
1 16. An apparatus for processing a supplementary product sale at a point-of-sale  
2 terminal, comprising:  
3 a storage device; and  
4 a processor connected to the storage device,  
5 the storage device storing  
6 a program for controlling the processor; and  
7 the processor operative with the program to:  
8 receive a plurality of rounding codes, each rounding code having a  
9 corresponding rounding multiple and fixed price;  
10 determine a purchase price; and  
11 round the purchase price based on the rounding codes.

1 17. The apparatus of claim 16, in which the processor is further operative with the  
2 program to:  
3 add at least one of the fixed prices to the purchase price, thereby generating an  
4 augmented purchase price; and  
5 round the augmented purchase price based on a rounding multiple.

1 18. The apparatus of claim 16, in which the processor is further operative with the  
2 program to:

3 round the purchase price based on a rounding multiple, thereby generating an  
 4 augmented purchase price; and  
 5 add at least one of the fixed prices to the augmented purchase price.

1 19. The apparatus of claim 16, in which the processor is further operative with the  
 2 program to:

3 select a rounding code, thereby defining a selected rounding code and a set of  
 4 unselected rounding codes.

1 20. The apparatus of claim 19, in which the processor is further operative with the  
 2 program to:

3 add the fixed price of each unselected rounding code to the purchase price,  
 4 thereby generating an augmented purchase price; and  
 5 round the augmented purchase price based on the rounding multiple of the  
 6 selected rounding code.

1 21. The apparatus of claim 19, in which the processor is further operative with the  
 2 program to:

3 round the purchase price based on the rounding multiple of the selected rounding  
 4 code, thereby generating an augmented price; and  
 5 add the fixed price of each unselected rounding code to the augmented price.

1 22. The apparatus of claim 19, in which the processor is further operative with the  
2 program to:

3 select a rounding code having a rounding multiple that is not greater than the  
4 rounding multiple of each unselected rounding code.

1 23. The apparatus of claim 19, in which the processor is further operative with the  
2 program to:

3 select a rounding code having a minimal rounding multiple.

1 24. The apparatus of claim 16, in which the fixed price and the rounding multiple of  
2 each rounding code are equal.
